Velocity

Hello VJTIans,

This contest is for selected people only who are either: part of syllabus.zip group OR approved by contest designers.

The round will start **2:30** and end at **4**. The contest is **1 hr 30 mins** long.

Questions will be from **leetcode**. It might be that you open the problem and you have already solved the problem. In this case we encourage you to resolve the problem which would be easy because you have done that problem. DO NOT CHEAT at any cost, lets make this contest fair for everyone involved!

Special thanks to: *Amal Verma* for suggesting the contest, *Abhay Upadhyay* for selecting the problems.

The problems will be **5 easy, 2 medium and 2 hard**.

The scores will be **100** for each easy, **300** for each medium and **600** for each hard.

Ranking will be based on scores first, in case of tie, lowest penalty time will be considered.

Penalty time will be calculated as sum of time (in minutes) of the submission of accepted code for each problem (basically **if you do problems faster, you'll be placed higher**).

This round is unprized for all. I will be posting the links of problems/problem number on my GitHub, whose link I will be providing at time of contest start.

Bring laptops if possible else use college pcs. We will we having this contest in lab 3 if its free. We might have to adapt according to availability of labs.

Prerequisites: Have a leetcode account, know any programming language (except html), that's it!

Have fun!!
